ASC QUALITY REPORT

Section 109. Quality reporting for hospital outpatient services and ambulatory surgical center services

(a) Outpatient Hospital Services.

Current Law

Each year the hospital outpatient department (OPD) fee schedule is increased by a factor that is generally based on the hospital market basket (MB) percentage increase. In certain years, the MB has been reduced by percentage points as specified by statute.

Explanation of Provision

Starting in 2009 and for each subsequent year, a hospital paid under the inpatient prospective payment system (IPPS) that does not submit required measures will receive an OPD fee schedule increase of the MB minus 2.0 percentage points. A reduction under this provision would only apply to payments for the year involved and would not be taken into account when computing the OPD fee schedule increase in a subsequent year.

Each IPPS hospital is required to submit data on measures under this section in the form, manner, and timing specified by the Secretary. The Secretary would be required to develop appropriate measures for the measurement of the quality of care (including medication errors) furnished by hospitals in outpatient settings and that reflect consensus among affected parties. To the extent feasible and practicable, the measures shall include those set forth by one or more national consensus building entitles. Nothing would prevent the Secretary from selecting the IPPS quality measures or a subset of such measures. The Secretary would be able to replace any measures as appropriate, such as where all hospitals are effectively in compliance or the measures have subsequently been shown not to represent the best clinical practice.

The Secretary would be required to establish procedures for making the submitted data available to the public. These procedures would ensure that a hospital has the opportunity to review data prior to being made available to the public. The Secretary would be required to report quality measures of process, structure, outcome, patients’
perspective on care, efficiency, and costs of care on the Internet website of the Centers for Medicare and Medicaid Services. Other conforming amendments would also be established.

(b) Application to Ambulatory Surgical Centers.

Current Law

Presently, Medicare pays for surgery-related facility services in an ambulatory surgical center (ASC) based on a fee schedule. The Medicare Prescription Drug, Improvement, and Modernization Act of 2006 (MMA) required the Secretary to implement a revised payment system for ASCs no later than January 1, 2008, taking into account recommendations issued by a required report from the Government Accountability Office (GAO). The GAO report, which has just been issued, was required to examine the relative costs of ASC services to those in hospital outpatient departments. GAO was also required to recommend whether CMS should use the outpatient prospective payment system as the basis for the revised ASC system. Total payments under the new system should be equal to total projected payments under the old system.

Explanation of Provision

In the revised payment system, the Secretary would be able to provide for a reduction in any annual update of 2.0 percentage points for failure to report required quality measures. A reduction under this provision would only apply to payments for the year involved and would not be taken into account when computing any annual increase factor in subsequent years. Except as otherwise provided by the Secretary, the provisions of subparagraphs (B), (C), (D), and (E) of the newly established Section 1833(t)(17) concerning the form and submission of data, the development of outpatient measures, the replacement of measures, and the availability of quality measures in a hospital outpatient setting would apply to ASC services.

(c) Effective Date.

Current Law

No provision.
